## **GEOLOGICS WINS UNITED SPACE ALLIANCE SDB OF THE YEAR AWARD**

ALEXANDRIA, Va., April 22 --

GeoLogics, a privately held engineering services company, today announced that it has been awarded the United Space Alliance's (USA's) "Small Disadvantaged Business (SDB) of the Year Award" for its contributions to the Space Flight Operations Contract (SFOC) and the space shuttle program. Two specific contributions were cited at the award ceremony by Michael H. Jones, USA's Director of Procurement and Subcontracts:

"GeoLogics developed the Unique Support Program (USP) to retain the knowledge base of proven experts in the aerospace community whose particular skills and expertise were being lost to the community through attrition. GeoLogics designed this process in conjunction with USA procurement, legal, and business management

~ MORE ~

to identity, select, and quickly provide subject matter expert or technical advisor support."

"GeoLogics was proactive in supporting the STS-107 (Columbia) investigation. Four personnel from GeoLogics' Unique Support Program participated on the STS-107 investigation team."

The award was presented by Jones and Michael J. McCulley, President and CEO of USA at the Bay Oaks Country Club in Houston on April 1 2004. Present to receive the award were Aileen McCall, Manager of GeoLogics' Houston Operations, Dick Brewer, Vice-President of GeoLogics Consulting, and Roberto Lopez-Aparicio, Sr. Vice President and founder of GeoLogics Corporation.

GeoLogics will not forget the courageous crews of Columbia and Challenger. We are committed to support the return to safe flight and human exploration of space for the benefit of all mankind. GeoLogics has been providing temporary technical and professional personnel to USA since 1996.

#### About GeoLogics

GeoLogics is one of America's fastest growing technical services companies with offices in California, Colorado, Massachusetts,

South Carolina, Texas, Virginia, and Germany. GeoLogics produces mission critical solutions and provides technical support in the areas of research and development, engineering, communications, software, and systems development. GeoLogics was created to provide first-class specialized R&D and engineering services to companies so they could concentrate in their core business areas. GeoLogics has grown to become a successful and award-winning high-technology company supporting the defense, IT, and telecommunications industries, as well as numerous government agencies. GeoLogics has won Washington Technology's Fast 50 award four years in a row.
